## WORK EXPERIENCE

### Automation Engineer

IPsoft

07/2016 – Present

Amsterdam, The Netherlands

#### Achievements/Tasks

- Member of an international team of 15 Automation Engineers, achieving just-in-time and lean production using modern and Agile tools (Jira, Confluence, Bitbucket's Git repositories, SCRUM meetings with daily sprints).
- Creating and maintaining technology to monitor and control the services for an average of 1000 CIs (Configuration Items a.k.a. Servers or other devices) per client.
- Cloud Automation Account Lead for one of IPSoft's main customers (over 15000 CIs). Driving the account in direct and daily cooperation with 2 Client SME and their Project Manager, being the active part from analysis to implementation, testing and deployment in production.
- Designing, programming, simulating and testing automated machinery and processes in order to complete exact tasks.
- Creating and updating design specifications and other detailed documentation of my creations.

Contact: Michell Grauwman – michell.grauwman@ipsoft.com
